

Summer school in Integrative Biology & Ecology: Toulouse, France

Application deadline: 21 April 2015 You are studying for a Master degree this year? You are a PhD student or a post-doc? Apply now for an original international Summer School in a stunning location... This summer school, combining plant biology and ecology, hosts up to 25 students...

As part of its training program, the Labex TULIP organizes its fourth Summer School in Integrative Ecology and Biology "Biological interactions from genes to ecosystems" (18-24 July 2015). The scientific programme includes plenary lectures and workshops, and covers genetic, molecular, physiological, evolutionary and ecological aspects of interactions between organisms and between organisms and their environments, in microbial, plant and animal biology. You will meet top international experts, as well as top Toulouse researchers working in these fields, and experience an innovative training using project-based learning.

Description

Below the list of international researchers who have already confirmed their participation: Richard P. Oliver (Curtin University of Technology - Australia) Marc-Andre Selosse (National museum - France) William Vickery (Quebec University at Montréal - Canada) Ulf Dieckmann (International Institute for Applied Systems Analysis - Austria) TULIP researchers who will stay with students the whole week and have already confirmed their participation: Audran Corinne (GBF), Danchin Etienne (EDB), Mazars Christian (LRSV), Raffaele Sylvain (LIPM), Roby Dominique (LIPM), Roy Mélanie (EDB), Thebaud Christophe (EDB)... More on TULIP LabEx website... Through plenary lectures and workshops, the program will cover many features of organism-organism interactions from both ecological and biological points of views. The programme will also include visit of unique place like the Experimental Ecology Center of CNRS in Moulis... At a glance : - Actively participate in elaborating research projects during workshops, - Meet experts from Toulouse and other internationally renowned laboratories, - Enjoy the inspiring Pyrenees location chosen for the Summer School. Free accommodation is provided for all participants, limited in number to a total of 25 (undergraduate, graduate and post-docs)

Benefits

Free accomodation and transportation from Toulouse to Summer school location is provided
